Embroidery care instructions

Home Laundering

- It is recommended that all embroidered garments should be washed with a mild detergent with no chemical admixtures at 60° C/140° F.
- Do not use chlorine bleach, optical brightening agents, peroxide or sodium carbonate.
- If bleach is required for washing, use non-chlorine bleach in accordance with product instructions .
- Machine wash cold water. 60° C/140° F recommended (Maximum 95° C /203° F)
- Delicate wash cycle.
- If color residue appears in water, rinse first in lukewarm water and then cold several times until rinse water becomes clear.
- Remove promptly after wash cycle completion.
- Never leave any piece of embroidered clothing soaking or in water or lying in a pile when wet.
- Upon completion of the washing cycle, place articles immediately in the dryer, use normal setting. (For best results, we recommend preheating the dryer.)
- Do not wring out the embroidered articles.
- Do not rub stained embroidery.

Dry Cleaning

Embroidery may be dry cleaned, however, extreme care should be exercised when dry cleaning. Special care must be taken when dark shades are dry cleaned. Avoid use of pre-spotting agents.

Industrial Laundering

Garments that are embroidered can be industrially laundered when proper procedures are followed as outlined by the International Fabricare Institute. Maximum temperature 95° C /203° F and can be washed with heavy duty detergents. Use only those which do not contain bleaching agents, chlorine, optical brightening agents, peroxide or sodium carbonate. Embroidery may be dry cleaned, however, extreme care should be exercised when dry cleaning. Special care must be taken when dark shades are dry cleaned. Avoid use of pre-spotting agents.

Ironing

- Embroidered fabrics should always be ironed on the reverse side.
- It is recommended to iron embroidery between two pieces of cloth.
- It is not recommended to wet embroidery prior to ironing or to use a steam iron.
